TRTO

Accounting software for groups and FIT for tour operators

TRTO allows you to process data from Cohtaxion, Exagohn and GSC modules in a single, simple and user-friendly interface. These comprehensive accounting features guarantee you an ideal management of your transactions.

Fonctionnalities

- Manage your accounts payable and accounts receivable
- Automatically calculate taxes and administrative fees
- Manage payroll and timesheets

- Manage your purchases, sales, disbursements and receipts, as well as discounts and deposits
- Easily adjust your inventories and make transfers
- Automatically generate your custom reports and forms

The tourism industry has special needs. This is why the Mercantour tourism software is specially designed to meet the specificities of operations specific to tour operators and receptive agencies.

Adapted transaction management system

As a tourism business, you can opt for various classifications of your transactions. Indeed, TRTO allows you to process your income by customer departure date or invoice date, depending on your preferences.

A single database and a universal interface

While our various modules offer you various essential options such as the management of your accounts payable and receivable, the automatic calculation of taxes and the automatic generation of your reports, all of this data can be processed on a single, easy-to-use interface by our accounting software TRTO.

Unparalleled customer service and resources at your fingertips

Doing business with MDM Monacoh means surrounding yourself with a dedicated team that values listening and efficient customer service. In addition, thanks to contextual online help easily accessible from any screen of our platform, you can quickly consult a large library of solutions to the most common accounting problems in order to save you even more time and headache.

Keep your books of account up to date in accordance with OPC rules

TRTO allows you to import three crucial pieces of information into your books:

- All sums received from your customers, regardless of the payment method used
- Your disbursements made from your trust account
- The balance of your trust account, in total and for each client
