

# ORT

Management software  
for orthodontists

## What is ORT ?

ORT medical practice management software is specifically designed for orthodontic clinics. Combining a range of innovative technologies carefully developed by MDM Monaco as well as a simple and user-friendly interface, ORT allows you to perform all your practice management tasks in one comprehensive software.

## Advantages

### Management of your medical staff, simplified

ORT allows you to simplify your human resources management activities through various essential functions.

Suitable for multi-doctor clinics, ORT medical practice management software allows you to manage multiple calendars in one platform, so you can synchronize your medical staff's schedules in no time.

Whether it is vacation or sick leave, all the information relating to the availability of your employees is available in one place and can be filtered by doctor or clinic.

The calendar options offered by ORT are numerous and versatile, as well as customizable at will. In addition, any appointment registered in the calendar is automatically synchronized to the availability of the doctor in charge.

### Efficient medical appointment system

Our orthodontic software's integrated appointment scheduling system is designed to optimize every element of the medical visit management process.

The user can record multiple appointments for the same patient, manage reminders automatically and easily record "no-shows". With ORT, it is even the modification of appointments and the management of patients without an appointment which are facilitated!

### Powerful patient management software

The administrative management of patients is at the heart of the success of an orthodontist clinic. ORT facilitates the organization of your patient records and brings together all the information necessary for patient follow-up in one place.

Keep the consultation or examination reports of your patients, integrate photos, X-rays, diagnoses and traces in their files and manage these images efficiently thanks to our powerful patient management module.

### **Integrated medical billing system**

Managing patient bills efficiently is an essential step in running an orthodontic practice. That's why ORT is armed with all the invoicing, dunning and collection tools you need. With ORT, centralize all your administrative activities, including the design, editing and printing of your invoices.

In addition, thanks to its integration with MDM Monaco's powerful TRT accounting management tool, ORT allows you to record and process all your transactions automatically in order to manage your clinic's accounting without headaches.

### **Supervision of all your clinics in one place**

Do you have several orthodontic practices to manage? With ORT, you can supervise the administrative activities of all your clinics on the same platform, without friction.
