

What is GSC ?

The GSC module, or Statutory Communications Manager, is the reservation management tool integrated into Mercantour. Find out how it can optimize your communications with your suppliers!

The GSC module is one of the tools integrated into the Mercantour software. It allows you to accomplish several repetitive tasks more quickly and efficiently, saving you time and money at the same time.

Fonctionnalités

Reservations by email using forms integrated into Mercantour

Thanks to its integration into the modules Cohtaxion Where Exagohn , the GSC reservation management tool allows you to easily process all your reservations in the same database through the Mercantour interface .

Managing your communications with suppliers

The GSC reservations management module allows you to automatically receive responses from your suppliers on your Mercantour database.

These responses thus allow the module to update the status of your services according to the nature of said responses and to enter the date on which your services are confirmed by your suppliers.

When your proposals are rejected, and your suppliers make you a counter-offer, the GSC module then registers these alternative proposals, for quick and easy subsequent consultation and continuous monitoring of the status of your negotiations.
